

Everything

Berman

so-long to good old yesterday
it's been real but time will not stand still
so-long to good old apathy
it's been real but now you see that all this is dead you'll see
its everything... you'll never be
you'll see
its everything... you'll never be
this time
it's you it's me it's everything you'll never be
this time
it's you it's me it's everything you'll never beso-long to all these little games
it's been fun but look at what it cost
sit back and find another way
to live life like it's not only hiding from shame
