I Heard That

Sixwire

I never meant to let you down, girl
Wrapped up in my own little world
You're leaving what am I missing?
Did I hear you say I never listen? WellI never heard when you cried
I never heard when you tried
To tell me that I was slowly losing youI never heard you mention
I should've paid more attention
And that's a factBut when you said that you were leaving me flat
And you were never coming back
Baby, I heard thatI'll hang on to our love, tooth and nail
Keep my eye on every detail
I love you and you're gonna know it
There's no way I'm gonna let you go unnoticed, 'causeI never heard when you cried
I never heard when you tried
To tell me that I was slowly losing youI never heard you mention
I should've paid more attention
And that's a factBut when you said that you were leaving me flat
And you were never coming back
Baby, I heard that, yeah yeah'Cause I'm a new man and I can prove it
How could I have ever been so foolish?
Yeah yeahI never heard when you cried
I never heard when you tried
To tell me that I was slowly losing youI never heard you mention
I should've paid more attention
And that's a factBut when you said that you were leaving me flat
And you were never coming back
Baby, I heard thatAnd when you said that you were leaving me flat
And you were never coming back
Baby, I heard that, oh oh
Baby, I heard that
