

# Already It's Heaven (Re-Recorded)

## David Houston

Tonight I told all my friends goodbye  
And I walked away so they wouldn't see me cry  
And hit for swingin' doors as fast as I can  
For what love had done to me shouldn't happen to a man  
And now I find myself sittin' here with you  
And you make me wonder why I ever felt blue  
You show understandin' a few people know  
And now that I found you, I'll never let you go  
Already it's heaven and we've barely met  
And you've not even started lovin' me yet  
'Cause you've made it sweeter than it's ever been  
And if you should love me what would it be then  
Already it's heaven the long search is through  
And it's so good to know now that heaven is you
