Got Me Missing You

Lisa Stansfield

Sometimes people make mistakes
They play the game, play hard to get
Then it all goes wrong and they end up being lonely
I'm one of those peopleGot me missing you
You've got me missing youAt the time it seemed okay
Nothing too serious I said
Just two people having fun
Or so I thoughtAt the time I was playing it cool
I had it all under control
But then I broke the golden rule
I went and said, "You'd never have me"
But babyYou've got me missing you
Every day, every night
You've got me missing you
Without you this ain't a life
Got me missing you
And baby try as I might
I just can't stop this pain insideIf I could do it all again
I'd say the things I truly meant
'Cause now you're gone, I've gone insane
Funny how I always said, "You'd never have me"
But babyYou've got me missing you
Every day, every night
You've got me missing you
Without you this ain't a life
Got me missing you
And baby try as I might
I just can't stop this pain inside, nothingI stay up late at night
'Cause I've been sleeping light
I've made a full-time job of going out of my mind
Can't see one good reason
I should live my life without you, without youGot me missing you
Every day, every night
You've got me missing you
Without you this ain't a life
Got me missing you
And baby try as I might
I just can't stop this pain insideGot me missing you
Every day, every night

You've got me missing you
Without you this ain't a life
Got me missing you
And baby try as I might
I can't stop, I can't stop this pain insideGot me missing you
Every day every night
You've got me missing you
Without you this ain't a life
Got me missing you
And baby try as I might
I just can't stop this pain inside
