Touch

Darren Hayes

One touch, spark, electricity
Flame burns hot and viciously
Microscopic, glittery
Catalytic energy
Tiny glow so flickery
Scintillation, glittering
Ember, heat, so viciously
Pulsing flow electricity
There's an energy
Washing chemically over me
I can't take it anymore
Like my destiny running endlessly over me
You're the one I'm waiting for
You know that we are the sun and the moon, the stars
Every time we touch you know that we are the light
And the universe has been changed because we touched
Our sun flash so brilliantly
Incandescent energy
White hot luminosity
Phosphorus intensity
Radiate so vividly
Beam of light transmitting a
Wave of glowing, glimmery, shining flash
Every time we touch
There's an energy
Washing chemically over me
I can't take it anymore
Like my destiny running endlessly over me
You're the one I'm waiting for
You know that we are the sun and the moon, the stars
Every time we touch you know that we are the light

And the universe has been changed because we touched
One touch, spark, electricity
Flame burns hot and viciously
Microscopic, glittery
Catalytic energy
Tiny glow so flickery
Scintillation, glittering

Ember, heat, so viciously
Pulsing flow electricity
There's an energy
Washing chemically over me
I can't take it anymore
I can't take it anymore
There's an energy
Washing chemically over me
I can't take it anymore
Like my destiny running endlessly over me
You're the one I'm waiting for
You know that we are the sun and the moon, the stars
Every time we touch you know that we are the light
And the universe has been changed because we touched
There's an energy
Washing chemically over me
I can't take it anymore
Like my destiny running endlessly over me
You're the one I'm waiting for
I know that we are the sun and the moon, the stars
Every time we touch you know that we are the light
And the universe has been changed because we touched
