When It Ends

Street Dogs

Advisory - the following lyrics contain explicit language:

I met a girl at the bar during last call
I should have known that it wouldn't go real far
She sucked me in by the way she stared at me
Now she's gone and it stings
Now I seeIn the beginning it seemed really cool
I should have known that I would play the fool
Over and over, I said, I'd never do it again
But I think I like the pain
When it endsWhen it ends it always tears my stomach out
I'm gonna miss the way I used to make her shout
I know one day another girl will come around
Another chance just to say goodbye
When it endsYou'll be single, solitary
Just like you were before the start
When it ends
