

Do No Wrong

Thirteen Senses

Satellites contain us
Traffic lights control us
Rockets shoot us up into the stars
Rockets shoot us up into the stars Letters keep us posted
Numbers calculated
Nothing picks us up when we are down
Nothing picks us up when we are down Complement the atmosphere
Fill the ground with all our tears
Dry them up to make it clear
We do no wrong Complement the atmosphere
Fill the ground with all our tears
Dry them up to make it clear
We do no wrong Strange surrounds each corner
Stains pollute the water
Something for us all to think about
Something for us all to think about Summer sun protects us
Winter rains torment us
Now it seems to me, we can't be free
Now it seems to me, we can't be free Close the door before it's late
We were born to love and hate
Turn it down for our own sake
We do no wrong You fill your ears with every note
Direction seems the only hope
It's crowded, let's create now
We do no wrong Common sense protects us
Everything affects us
To the outside light, it's paradise
To the outside light, it's paradise
