

# No One Has Ever Looked So Dead

## The Organ

it really shook you when i said  
"no one has ever looked so dead"  
well, it's over and i can't go there anymoreand in the backseat of your car  
you showed me every single star  
and how the zenith and the sounds  
change in every single town  
well, it's over and i can't go there anymore
