

# Bloody Angel

## Avatar

How can I sleep  
When everyone else turns to dust, how can I breathe.  
When my mouth is filled with their ashes  
Another day lost trying to exit the program,  
I've seen enough  
To feed a psychosis for a lifetime Bloody angel! When did it start  
This force is too strong to resist  
Where is too far  
All I did was try to save them  
Haunted by screams  
Chasing me back to my childhood, I cannot flee  
I've got tormentours for a lifetime Come bloody angel  
Break off your chains, and look what I've found in the dirt  
Pale battered body, seems like she was struggling  
Something is wrong with this world Bloody angel! All that I know  
I'm willing to give it away  
All that I love  
Disappeared like sand in the ocean  
Remember the lives  
Lost within withering pages, trying to hide  
But I see tragedy through a lifetime.  
Bloody angel! Come bloody angel  
Break off your chains, and look what I found in the dirt.  
Pale battered body, seems she was struggling  
Something is wrong with this world Fierce bloody angel  
The blood is on your hands, why did you come to this world. Everybody turns to dust  
Everybody turns to dust  
Everybody turns to dust  
Everybody turns to dust The blood is on your hands  
The blood is on your hands  
The blood is on your hands  
The blood is on your hands Come bloody angel  
Break off your chains, and look what I found in the dirt.  
Pale battered body, seems she was struggling  
Something is wrong with this world Bloody angel! Bloody angel!
