

City Lights

[Avicii](#)

City lights, take me away
Now it's time we never ever look down
Dont be scared I am for real
Hide away and we will never be found
Its alright, we'll never look back
Birds will sing if we fall
Its alright, with memories inside
Midnight dust on the floor
Watch it turn into gold And I don't even know what's real
And I don't know what to feel
I'm the truth in disguise, I'm in love with your lies
'Cause I can't breath, can't settle down
And I don't know what to feel
No I don't know what to feel See these lights, we're getting away
Heads won't find us, we're not making a sound
We're not scared, we are for real
Love can't hurt us, now we're sheltered by lies It's alright, we never look back
Birds will sing if we fall
It's alright, with memories inside
Midnight dust on the floor
Watch it turn into gold
