Genedefekt

Green Velvet

Gene defect, gene defect
Gene defect, gene defect
Gene defect, gene defect
Gene defectAs I stepped into the room
(? distorted, couldn't catch it)
The doctor said to me "We have a remedy"They gave me pills for my ills
When I complained they said "chill"
My prescriptions they would filled
By dollar bills
Rid the world of defectsGene defect, gene defect
Gene defect, gene defectInstead of asking me how, when and why
It all began
They acted as if they knew me
Like my best friendsThey gave me pills for my ills
When I complained they said "chill"
My prescriptions they would filled
By dollar bills
Rid the world of defectsIt's unbelievable, it's inconceivable, incomprehensible
Gene defect, gene defect
I'm looking forward to the, the day when they will say "Ah, we love you the way you are"
Gene defect, gene defectThe drug industry has fooled me
Into believing I'm defected
And only they can correct itRid the world of defectsGene defect, gene defect
Gene defect, gene defect
Gene defect, gene defect
Gene defectThey gave me pills for my ills for my pills for my ills for my ills for my ills... (repeat until next line)Rid the world of defects
Gene defect, gene defect
Gene defectIt's unbelievable, it's inconceivable, incomprehensible
Gene defect, gene defect
I'm looking forward to the, the day when they will say "Ah, we love you the way you are"
Gene defect, gene defect
It's unbelievable, it's inconceivable, incomprehensible
Gene defect, gene defect
I'm looking forward to the, the day when they will say "Ah, we love you the way you are"
Gene defect, gene defect
