## **Memento Mori**

## **Moonspell**

I am the moment, the soul
The moment that ends it all
I am the second, the will
The serpent, the one you last recallThe living pulse of nightmares
Is on my side

With the shadows I fade into youA secret promise of leaving Blanking your eyes

When you look for me try for once insideIn the sleep of cruelty
The old sounds of you and meI am the moment, the soul
The moment that ends it all

I am the second, the will

The serpent, the one you last recall (You are lost)The ones so long forgotten Now at your side

Their spirits travel from me into youA rush of waters then afterlife

The wind in the trees

Yours is the fight in this minute darkI am the moment, the soul

The moment that ends it all I am the second, the will

The serpent, the one you last...In the sleep of cruelty The old sounds of you and meAnd for a moment it's gone

The beauty of it all

I am the second, the fall
The logic of it allI am the moment, the soul
The moment that ends it all
I am the second, the will
The serpent, the one you last recall
