Girl In the Moon

Icehouse

You got a long face, no place
Everywhere a bad case of nowhere news
And the weather man telling me
All of the time looks like rainPut on my Cadillac boots
And my magazine jeans though the colors don't rhyme
And I won't stop walking till I turn the blue world upside down
I say, hey, to the girl in the moonThere's a mad clock ticking inside of my brain
And it might just explode I got a subway running
Right over my roof I can't hear a sound
And there's Batman and RobinLeaking into my room
Through a hole in the wall and there's Jane and Tarzan
With their favorite monkey what's his name?
I say hey to the girl in the moonThere's a mad clock ticking inside of my brain
And the colors don't rhyme
I'm gonna stand here waiting till the girl in the moon comes back down
I say, hey to the girl in the moon
