

# Girl In the Moon

## Icehouse

You got a long face, no place  
Everywhere a bad case of nowhere news  
And the weather man telling me  
All of the time looks like rain Put on my Cadillac boots  
And my magazine jeans though the colors don't rhyme  
And I won't stop walking till I turn the blue world upside down  
I say, hey, to the girl in the moon There's a mad clock ticking inside of my brain  
And it might just explode I got a subway running  
Right over my roof I can't hear a sound  
And there's Batman and Robin Leaking into my room  
Through a hole in the wall and there's Jane and Tarzan  
With their favorite monkey what's his name?  
I say hey to the girl in the moon There's a mad clock ticking inside of my brain  
And the colors don't rhyme  
I'm gonna stand here waiting till the girl in the moon comes back down  
I say, hey to the girl in the moon
