

Yet the Watchers Guard

Thergothon

[june-august 1991]the towers they stand so tall and proud
at the planes of the planets of madnessthe realm of wind and the darkened deities
the black goat of the woods with the thousand youngthe watchers beyond the universe
the eyes to hidden dimensionsenormous buildings of slimy black stone
built by hands not similar to man
on a black star near aldebaran
twisted sky of poison clouds
"despite the waste outlook this region is inhabited
the unholy presence of these ancient beingsis almost touchable
they can neither see them nor touch them, but you can
feel them present at all the times
and you can smell them, smell their foul presence. . ."watchers understand
yet they guard
