

The Real Thing (ft. Wendy & Lisa)

Gwen Stefani

I've seen your face a thousand times
Have all your stories memorized
I've kissed your lips a million ways
But I still love to have you around I've held you too many times to count
I think I know you inside out
And we're together most days
But I still love to have you around And you're the one I want and it's not just a phase
And you're the one I trust, our love is the real thing Don't go away
My love (my love)
I want you to stay
In my life
Don't go away
My lover (my love)
I'm happiest when we spend time You're a salty water, ocean wave
You knock me down, you kiss my face
I know the storms will always come
But I still love to have you around Heavens knows what will come next
So emotional, you're so complex
A roller coaster, built to crash
But I still love to have you around You're the one I want and it's not just a phase
You're the one I trust, our love is the real thing Don't go away
My love (my love)
I want you to stay
In my life
Don't go away
My lover (my love)
I'm happiest when we spend time (it's only you and I) It's you there when I close my eyes
And you in the morning
I never thought you'd still be mine
Or I'd really need to have you around Don't go away
My love (my love)
I want you to stay
In my life
Don't go away
My lover (my love)
I need you, you're my love supply Don't go away
My love (you're my love supply)
I want you to stay
In my life (every day, every night)

Don't go away
My lover (you're my love supply)
I need you, you're my love supply
