

Happening Today

Orange

Don't let these rainy clouds drag you down
It's just a matter if time before you figure it out
Don't be afraid I'll never back downSome things aren't easy
And you think you're crazy
But outside everything's happening todayOh I am alive, and I will survive
We've all had times, times where we've been wondering why
It makes me realize I've wasted my time
On this, on this, on youThings aren't easy
And you think you're crazy
But outside everything's happening todayOh please believe me
This world's amazing
'Cause outside everything's happening todayToday's the day
Today's the day
Today's the day
Today's your day
