Not Forgotten You

Kelly Willis

Came home a little early last night shed not a tear when I turned out the light
No I don't hurt like I used to
Didn't wait for the knock on my door drawer in the room ain't empty anymore
So many got it tougher than I do
But I have not forgotten I have not forgotten I have not forgotten youTime flies and you just know time to think about lettin' go
Times I even forget to be blue
Big feet to shufle them sands leave no trail and slip right through your hands
Done every little thing I know to do
But I have not forgotten I have not forgotten I have not forgotten youAnd I said hail the western bound with it's black tail flying
Lay on the rails and leave me to dream of where your love was mine
[guitar]
Time flies and you just know time to think about lettin' go
Times I even forget to be blue
But I have not forgotten I have not forgotten I have not forgotten you
No I have not forgotten I have not forgotten I have not forgotten you
Hey I have not forgotten I have not forgotten I have not forgotten you
