

Not Forgotten You

[Kelly Willis](#)

Came home a little early last night shed not a tear when I turned out the light

No I don't hurt like I used to

Didn't wait for the knock on my door drawer in the room ain't empty anymore

So many got it tougher than I do

But I have not forgotten I have not forgotten I have not forgotten you
Time flies and you just know time to think
about lettin' go

Times I even forget to be blue

Big feet to shuffle them sands leave no trail and slip right through your hands

Done every little thing I know to do

But I have not forgotten I have not forgotten I have not forgotten you
And I said hail the western bound with it's
black tail flying

Lay on the rails and leave me to dream of where your love was mine

[guitar]

Time flies and you just know time to think about lettin' go

Times I even forget to be blue

But I have not forgotten I have not forgotten I have not forgotten you

No I have not forgotten I have not forgotten I have not forgotten you

Hey I have not forgotten I have not forgotten I have not forgotten you
