

# Survive

Steve Vai

Get ready for your life, won't you take your place in line  
You may close your eyes if you please Try to keep it clean, there's so many here you see, everybody needs to get  
by And if you fall on your face on the way, you'll get it together someday chorus:  
Like the sun in the sky, we will fall and we will rise  
Helping each other survive  
Just like the animals, we need to carry on, or how would we ever survive? Prejudice is pain, just like poison in  
your veins  
Burning up your hope and your strength Freedom you will find, in your spirit and your mind  
Nothing ever can take that away And when your castles of sand melt in the sea  
Mountains will move with your faith (chorus) (solo) (chorus repeats 2x)
