

Swordfish

Defeat The Low

Oh this could really waken you
It could make you or just
break you down
It takes a certain kind of sickness
to stick around Fell apart in a bad dream,
And throwing punches as hard as you can.
A nightmare they come out to slow
They won't call it a comeback.If you get distracted by
all the bright lights
All the flame highs
It'll pass you by.
Oh. It will pass you by It's almost like you've got this bomb
and it's strapped to your chest
and you're, begging for attention.
Nobody notices, and no one cares.Fell apart in a bad dream,
And throwing punches as hard as you can.
A nightmare they come out to slow
They won't call it a comeback.If you get distracted by
all the bright lights
All the flame highs
It'll pass you by.
It will pass you by.See, I would never want to take it back.
I would never change a thing.
I wouldn't ever want to start again,
Cause I have learned from my mistakes.
See, I would never take it back.
I would never change a thing.
I wouldn't ever want another chance,
I have learned from my mistake.Fell apart in a bad dream,
And throwing punches as hard as you can.
A nightmare they come out to slow
They won't call it a comeback.If you get distracted by
all the bright lights
All the flame highs
It will pass you by.
