

Recognise

Fred V & Grafix

All the words that we've said
Draw me in, turn the page
Recognise what we've found
Free from all, without doubt
All the moves that we make
Listening for something
Oh, the night is still young
Got my mind made up now
Rush of blood in my head
We both know how this ends
No more words to be said
Nothing else can compare
Moving slow, moving fast
As we glow in the dark
Recognise what we've found
Got my mind made up now
Now we're free, no more hurt
Run my hands through your hair
I breathe in, you breathe out
Got my mind made up now
