

To Zion Goes I

O.a.r. (of A Revolution)

Light of the candle bright ones soul one shined
Woke up new one morning feeling better than ever, fine
My chest no hurt no more something feel better
What's all the hate for? Now something feel better
To Zion Goes I (4x)

I'll walk through the valley and I'll follow the stars
I feel it's so close now, it can't be that far
In time some grow lonely, but time isn't done
It's time to go home now, you're not on the run
To Zion Goes I (8x)

One step forward and I crossed the line again
One step forward and I crossed the line again
I'm standing on the edge of a civilization and no one's around
I'm standing on the edge of a civilization and no one's around, and I ain't heard a sound
The path is snowed over the path lies ahead
In time we'll be down there, where nothing is said
There's no need to fear love, don't let love hide
We'll conquer the mountains, lay down by the riverside
To Zion Goes I (8x)
