

Goodbye Blue Sky

System of a Down

Your world has ended and life for us
So has the global marching economy
When life as when your own existence
Is only the wave of your lies When your earth is dieing, your sky, your earth
Your water and forests
Genetic world is picking over mutations of man
Your world is dying (Blue sky, good bye, blue sky, good bye)
The CIA has sold you out along with the Pentagon
For a much better game, a much more profitable mortgage
(Good bye, blue sky)
Multi-national corporate America is what you name it, not a democracy
(Good bye, blue sky, good bye, blue sky, good bye) Good bye blue sky's, unless you open your eyes
Unless you open your eyes to what in the world is happening
(Good bye, blue sky)
The third world is waiting for you to wake up
(Good bye, blue sky, good bye)
