

Survival Car

Fountains of Wayne

Don't you wanna ride in my
Survival car?
We can take the long way home
Through Central Park Funny how the ground can find my wheels
I'm going where the road ain't there
And only riding on the path we made
To Union Square Doing like the young folks do
In west coast towns
Plowing like a banshee through
The overground Funny how the ground can find my wheels
I'm going where the road won't dare
And only riding on the path we made
To Union Square Everybody hit the ground
I think I might have missed my calling
Everybody turn around
The light's about to change
You better stand aside
Why you wanna walk?
Don't you want to ride, ride, ride, ride? Don't you wanna ride in my
Survival car?
We can take the long way home Funny how the ground can find my wheels
I'm going where the road won't dare
And only riding on the path we made
To Union Square And only riding on the path we made
Riding on the path we made
Riding on the path we made
To Union Square Don't you wanna ride in my
Survival car?
We can take the long way home
