Survival Car

Fountains of Wayne

Don't you wanna ride in my Survival car?

We can take the long way home

Through Central ParkFunny how the ground can find my wheels

I'm going where the road ain't there

And only riding on the path we made

To Union SquareDoing like the young folks do

In west coast towns

Plowing like a banshee through

The overgroundFunny how the ground can find my wheels

I'm going where the road won't dare

And only riding on the path we made

To Union SquareEverybody hit the ground

I think I might have missed my calling

Everybody turn around

The light's about to change

You better stand aside

Why you wanna walk?

Don't you want to ride, ride, ride, ride?Don't you wanna ride in my

Survival car?

We can take the long way homeFunny how the ground can find my wheels

I'm going where the road won't dare

And only riding on the path we made

To Union SquareAnd only riding on the path we made

Riding on the path we made

Riding on the path we made

To Union SquareDon't you wanna ride in my

Survival car?

We can take the long way home
