Predators

The Setup

When wo were young we played among the flowers
And sucked upon the nipples of nur motherstitsBut now before us all of nature cowers
Through fear und death we've moulded out relationshipsThe breeze is blowing lightly through the tree tops
The sun is out, we're basking in the light of day
The birds are eating bugs out of out sore spots
The clouds are drifting os we dream the hours awayBut I got restless, felt a little hungry
So I jumped into my car
Did not go far
Found a parking spot
And got out for a walk
Using my eyes, using my ears
I'm walking I'm smelling
I'm walking I'm smelling
Something's cooking
I smell something cooking
Something's ooking
I smell something cooking
It's running, but I'm faster
It's jumping that's what I'm afterThere's new life for us to eat
I prey on the young und weak
There's new life fore us to eat
I prey on the young und weakWhat's your problem, life's a breeze
Frist you run and then you eatThe pavement bubbling tar along the runway
The purring of our engines drives the birds away
A thousand voices cry in the arena
A thousand voices cry with just one thing to say
When we were young the world was like a vision
The colours und the sounds they look out breath away
But now we watch it all on television
While eating processed meat off of a plastic trayBut I got restless felt a little hungry
So I jumped into my car
Did not go for
Found a parking spot
And jumped out for a walk
Using my eyes, using my ears
I'm walking I'm smelling
I'm walking I'm smelling
Something's cooking
I smell something cooking

Something's cooking
I smell something cooking
It's running, but I'm faster
It's jumping that's what I'm afterThere's - life for us to eat
I prey an the young und weak
There's new life for us to out
I prey on the young und weakkLife is simple, here's the key
First you rest and then you feedWe're Predators
We're Predators you and I
I have no blood on my hands
I have blood on my teeth
Relish
