

Heads Above

WhoMadeWho

Keep our heads above the water, for air
Bad imitation of other lovers, flare
With how many beats per minute
Could you break my visions?

Little by heart, the rest decisions
And the longer we go, calling out
And the longer we go, just calling out
Someone that I knew came and took the fight
Something I did was right, just calling out

Baby what you do is gonna be alright
Feed the hungry, leave you nothing
Water waste at the bitter ending
With how many beats per minute
Can I break your heart?

At least we tried to build up something
But the longer we go, calling out
And the longer we go, just calling out
Someone that I knew came and took the fight
Something I did was right, just calling out
Baby what you do is gonna be alright
