

Dance in the Starlight

[Axxis](#)

Moonlight eyes - you can break my spell
I never thought that you wanna be mine
I could not trust my eyes on that Saturday night
Holdign you in the moonshineLight and shade - close together sometimes
But you fade all the shadows away
I feel the spirit of passion burnin' in me so let me sayDance in the starlight light up the dark night
I'll never want to let you go
Dance in the starlight and light up my life
Oh our love will live and grow - live and growUnder the roof of god all our prayers come true
Being one with the universe
Midnight wind will blow my promise to you
Let us embrace our mother earthLosing time - losing space - in this hot summer night
Our witness will be our brother moon
Watching out for us, sending words with the wind
Listen to it's Midnight tuneDance in the starlight light up the dark night
I'll never want to let you go
Dance in the starlight and light up my life
Oh our love will live and grow
I'll never want to let you go
Dance in the starlight
Oh our love will live and growDance in the starlight light up the dark night
I'll never want to let you go
Dance in the starlight and light up my life
Oh our love will live and grow
Dance in the starlight light up the dark night
I'll never want to let you go
Dance in the starlightStarlight - I'll never want to let you go
