

We Know Who Our Enemies Are

Me Without You

Save my skin, I need a medic
Hold me down, I'm only sewn down
Save my teeth, show me you meant it
Catch my death, I'm only sewn together
Save my skin, I need a medic
Hold me down, I'm only sewn down
Save my teeth, show me you meant it
Catch my death, I'm only sewn together
Catch my death
My eyelids are heavy, and the night's wearing on
Your story's familiar, and your innocence is gone
We'd burn like the morning, then break like your heart
Fall in love without warning just to fall back apart
All fevered and blistered, with nothing at stake
I feel the warmth of her whisper, and the cold of my mistakes
Her soul in the balance, my heart in her hands
I made her a widow, she made me a man
