

It's No Secret

Ringo Starr

Lately, I've been so crazy
I wanna talk to you
I need to talk to you And lately, you ain't my baby
I want a word with you
A moment alone with you 'Cause you, you were a part of my heaven
My shining star
And now, I look at you and I wonder
Just who you are It's no secret what your love
What your love is doing to me
It's no secret that your love
That your love, that your love is killing me Lately, I've been so lonely
I need a smile from you
Something to pull me through But we know, love can be mellow
If we can just talk it through
It's gonna feel brand new 'Cause you, you were a part of my heaven
My shining star
And now, I look at you and I wonder
Just where we are It's no secret what your love
What your love is doing to me
And it's no secret, how your love
How your love, how your love is hurting me It's no secret
What your love has meant to me
And it's no secret
What your love, what your love is doing to me It's no secret
That your love is hurting me
And it's no secret
That your love, that your love is killing me
