

I've Been Loved

Mikal Cronin

Wait
A circle moves in front of me
And the fuel
Burns away
And I know
There's peace inside the open flame
Maybe there we can stay
But I'm know, sitting alone in a silent room
So I say I've loved, I've been lost, I've been locked inside my mind
I can feel when it's real and it's been with me all this time
I've been lucky enough to find love of a different kind Give me faith, I feel the ceiling slip away
And the rain slows
There's a chance today you find your open door
And I'm here, here to hold
Who'd have known, feeling alone in a crowded room
Can say I've loved, I've been lost, I've been locked inside my mind
I can feel when it's real and it's been with me all this time
I've been lucky enough to find love of a different kind
I've loved, I've been lost, I've been locked inside my mind
I can feel when it's real and it's been with me all this time
I've been lucky enough to find love of a different kind
