Changing Colours

Waylayers

You look at me with uncertainty
You look at me with urgency
You look at me with fear in your eyes
Like you're about to fall awayDon't be afraid to change your colors now
I've know you all summer, you rose above it all
I see you hesitate to fall down
But it's pretty good view from down here tooWhen the wind takes you it takes me too
And when you change colors, I change mine too
Try not to think and I will try too
And when you let go, I will let go tooI knew you when you were green and strong
You were like a feather on a wing, so long
You know I will miss you when you're gone
But don't be afraid if you just can't hang on'Cause when the wind takes you it takes me too
And when you change colors, I change mine too
Try not to think and I will try too
And when you let go, I will let go tooThe cold air is pushing hard on you
I know what you're saying, I can feel it too
You'll go through changes and I'll go through them too
Don't be afraid now, no don't be afraid'Cause when the wind takes you it takes me too
And when you change colors, I change mine too
Try not to think and I will try too
And when you let go, I will let go too
