

No One Survives (Acoustic)

Ugly Kid Joe

Made a hole in the sky
Just to watch the world die
But the sun came in
And showed them how to live again
They left me here alone
With the way to get home
Watched it all begin
And this is where it ends They say the world is alive
But long ago we all died
Life is a suicide
That everyone tries to justify
So get in the back of the line
Cause happiness
You'll never find
And in the end
No one survives So I poisoned the sea
Just to watch the world bleed
But the rain came in
And made the water clean again
They left me here alone
With the way to get home
I watched it all begin
And this is where it ends
And all your days are over
And all you can't remember
That's nothing new we've met before
