

Let Go

Otter Petter

Took the left lane down the expressway
Kicked your shoes off said you needed the air
Nothing since has felt like expected
Pushing through your lungs you said you care

Everyday moves faster than sound
Our hearts were jets that would never come down
Our hands had moments that would never be found
Be found so let go
Just let go

Those were the days of checking out and watching [?]
Late December, '86 the year
Your lips were liquid cells advancing through my blood stream
[?] filled my brain and plugged my ears

Everyday moves faster than sound
Our hearts were jets that would never come down
Our hands had moments that would never be found
Be found so let go
Let go

We paint these picture
Of when we're younger
There's nothing better
