Leapfrog

Darren B

Laws of simplicity
Let me try to abide
Come let the system try
To ride me through the tide
I feel my energy pulsating through the room
I think this mix will fall together pretty soon
I sit by with all my guns
They thought they had it
Ended up with none
Like leapfrog someone
Jumped my space
No more summer complacent days
Search for the simple way
But that they'll never find
I think our efforts will
Prove worthy over time
I'll do it every day, I'll try it anyway
Until I find the one that keeps me right on line
