Alien Attack

S.P.O.C.K

Think of old geology
It is but a theory
What about reality?
Nobody was there to seeSo let's go back in time
Sixteen million years ago
Another race appeared to our world
Foresaw the catastropheFled to space and fled a tragedy
Now they're here again
With a simple claim
Alien, alien attack
They want their planet backNo matter what we say
Extermination is the way
We will never stand a chance
To them we are no more than ants
