

# Alien Attack

## S.P.O.C.K

Think of old geology  
It is but a theory  
What about reality?  
Nobody was there to see So let's go back in time  
Sixteen million years ago  
Another race appeared to our world  
Foresaw the catastrophe Fled to space and fled a tragedy  
Now they're here again  
With a simple claim  
Alien, alien attack  
They want their planet back No matter what we say  
Extermination is the way  
We will never stand a chance  
To them we are no more than ants
