

Underneath the Night Sky

Young Love

Loud screams, fighting words, awful things were said
You might not be able to take back
She puts her hands on his face
And tells him get out, get out Just leave, she pleads
He can't believe what he's done
As he's walking down the street
The night keeps warning him to turn around Underneath the night sky take flight
Underneath the night sky she cries
Underneath the night sky one last time
You know where I'm going Underneath the night sky
Remembering the reasons why
Underneath the night sky
I'll fall for you tonight again On his way to familiar arms
Someone who will know him, the girl who understands
Stops dead in his tracks to see
It's too much too give up, not too late for apologies Turns down the wrong street, give me all your money
Should know better than to be here alone
Tries to run, doesn't feel like a fight
She could hear the shots ring out from home Underneath the night sky take flight
Underneath the night sky she cries
Underneath the night sky one last time
You know where I'm going Underneath the night sky
Remembering the reasons why
Underneath the night sky
I'll fall for you tonight again Don't forget to hold her tight
Everything can change so fast Underneath the night sky take flight
Underneath the night sky she cries
Underneath the night sky one last time
You know where I'm going Underneath the night sky
Remembering the reasons why
Underneath the night sky
I'll fall for you tonight again Don't forget to hold her tight
Everything can change so fast, no, no, no
Don't forget to hold her tight
Everything can change so fast
