To the Edge

Life In Your Way

Leave the past
And set pace high for the future
We're making our way
This makes me believe in us againPersevere
Hold these bonds at strong
Ignite the fire
With one foot in front of the otherThe results I'm sure will speak for themselves
We can pave the way for days of hope and change
See the standards high, rebuilding self-control
And burn all the wasted timeWe must leave behind this modern way of reason
It's something that comes all too natural
Resolution to relive struggle
Opening one's own heart and push ourselves to the edge
