

All You Ever Think About Is Sex

Sparks

Think about the places
We've had our little fun
In the church at Christmas
Busted by that nun Then in that museum
Beneath the mastodon
Stating our positions
On the White House lawn All you ever think about is sex
All you ever think about exclusively
All you ever think about is sex
Alright with me Say, do you remember
The Dodgers and the Mets?
Fifty thousand people
Saw us and turned red I'm still not recovered
From Saturday's faux pas
When your father came home
Saw us and dropped dead All you ever think about is sex
All you ever think about exclusively
All you ever think about is sex
Alright with me All you ever think about is sex
All you ever think about exclusively
All you ever think about is sex
Alright with me In a world of lovers
We don't love each other much
Fact is, we're too busy
To love each other much All you ever think about is sex
All you ever think about exclusively
All you ever think about is sex
Alright with me All you ever think about is sex
All you ever think about exclusively
All you ever think about is sex
Alright with me
