

# I Think I'll Be Ok

## Bayside

You keep saying you've had enough  
And I know just how you feel  
You keep it all inside and its nipping at your heels

It's eating you alive  
I can see it in your stare  
I'd sit with you all night if I thought you'd even care

I've lost track of who I was some time ago  
I thought I figured out which way to go

[Chorus]

Now I hate to say that the only thing that keeping me alive is you  
The only thing that's keeping me alive  
But I can't say your name  
Oh think I'll be okay

I've had it up to here  
With your morbid ways  
Your happy being sad and you prove it every day

I've lost track of who I was some time ago  
I thought I figured out which way to go

[Chorus]

You don't want to see the less the light side of me  
Just say your prayers and close your mouth start curbing what comes out  
And find another way to feel important that can't be drank or snorted  
Don't call me up to say hello cause I don't want you around when I get home

But now I hate to say the only thing that's keeping me alive is you  
The only thing that's keeping me alive  
But I can't say your name
