

Roll Me Over

Louden Swain

Girl you come and say my name
You come and anything
Anything you say I melt for you
When you stare in to my eyes,
You give me exercise
All the pain and lies, I follow you You're the choir and the church
I got thoughts that break away
They beg to stay
Like a heart attack
Right behind my back
Love is more than just a push
It's a thrust
It's a shove me down
Roll me over
When it's over
They say that winter's just begun
The clouds have shot the sun
It's bleeding in a shade of overcast
But I got warmth inside my coat
I'm soiling all my oats
A cord is pulling steadily at my throat You're the executioner
I got thoughts that break away
They beg to stay
Like a heart attack
Right behind my back
Love is more than just a push
It's a thrust
It's a shove me down
Roll me over
When it's over
Girl you come and pull me in,
You come and tuck me in
Tuck me and say you'll dream with me
You, you stay like apple pie,
You stain like Cali wine
Say the word and I will follow you Your gates are open wide
I got thoughts that break away
They beg to stay
Like a heart attack

Right behind my back
Love is more than just a push
It's a thrust
It's a shove me down
Roll me over
When it's over
When it's over
