

On The Road

[Tom Vek](#)

You said, I was the backseat driver
You said, I was the backseat driver
You said, I was the backseat driver
You said, I was the backseat You said, I was the road map reader
You said, I was the road map reader
You said, I was the road map reader
You said, I was the road map You said, I was the driving license
You said, I was the driving license
You said, I was the driving license
You said, I was the driving license On the road, on the road, on the road
On the road, on the road, on the road
On the road, on the road, on the road You said, I was the hand break
You said, I was the hand break
You said, I was the hand break
You said, I was the hand break You said, I was the glove compartment
You said, I was the glove compartment
You said, I was the glove compartment
You said, I was the glove compartment On the road, on the road, on the road
On the road, on the road, on the road
On the road, on the road, on the road
