

Manhattan (Ryan Hemsworth Remix)

Cat Power

The hotel above and the street below
People come and people go
All the friends that we used to know Ain't coming back
Ain't coming back
Ain't coming back See your heart has a rhythm
Well see you got your secret on
You say hey and nothing to hide
You and secret life Don't look at the moon tonight
You'll never be never be never be Manhattan
Don't look at the moon tonight
You can never be never be never be never be Manhattan Your badge and your suitcase on
Your suit and your hair's not right
Cause nobody knows this woman by your side It's not me you know, it's a useful woman by your side
It's not me you know, it's a useful woman by your side
Manhattan See your heart has a rhythm
Well see you got your secret on
She say hey and nothing to hide
You and your secret life Don't look at the moon tonight
You'll never be never be never be Manhattan
Don't look at the moon tonight
You can never be never be never be never be Manhattan See your heart has a rhythm
You got your secret on
And you say you got nothing to hide
You, you, you and your secret life You'll never be never be never be Manhattan
Hollerin' at me hollerin' at you
Hollerin' at me hollerin' at you Even in a basement light
Free speech lipstick in the moonlight
?Now we're in a dark back room
Dancing to a different tune
Hollerin' at me hollerin' at you
