Black and White and Red All Over (Demo)

Biohazard

Fascism, the epitome of ignorance
Listen up, I'll give you a for instance
People go hating for the color of skin
Won't they learn, they'll never winPlay into the hands of the media vultures
We must learn to unite our cultures
Violence constantly tears us apart
Show the world that we've got heartBlood is spilled on black and white
Different colors, why do we fight?
Face the facts, stone cold sober
Black and white and red all overThousands die and kill each other
Someone rapes and stabs their mother
I think it's sick to count the death toll
On and on the media rollsDrive by shootings, homicide
Nobody cares about the mother who cried
A family's grief stepped on by ratings
Understand why I keep hating[Incomprehensible]It makes no sense for us to be pawns
In the chess game that the media plays
If the streets are where you run, there you die, why?
Find yourself a way out, there's no way outBlack and white and red all over
Ruling out the positive and any hope for peace
This will only kill the moral, paper sales increase
This shit has got to ceaseBlack and white and red all over
Believe half of what you read and half of what you see
Put two and two together and you'll have reality
Can't you see my reality?Blood is spilled on black and white
Different colors, why do we fight?
Face the facts, stone cold sober
Black and white and red all overTurn on the TV and what do I see
Killing, murder and blasphemy
Rape, arson, robberies
People die of incurable diseaseCrashes, bashes, people on crack
Scandal, war and heart attack
Always strife in the middle fucking east
If war sell papers why don't peace
