

Wheels on Fire

Glen Hansard

Well you say, you won
You'll work until the work is done
I don't see you lift a hand
To help out one of your fellow man And they're using us up again
But I won't be no puppet on a string Your wheels on fire
Your one desire
Is to roll and rule over everyone
Come on let them do it
We see right through it
You can roll and rule
But we will overcome
You say, you won
The talk until all the talk is done
I see you move your mouth
But I hear nothing of any weight come out And you're calling
On out the feed again
You're talking, talking
But you're not really saying anything Your wheels on fire
Your one desire
Is to bend and twist every little thing we've done
Go on and do it
We see right through it
You can bend and twist
And we'll be holding strong You're building us up just to tear us down
You think that nothing's gonna stop you now
But I hear you're preaching from a nervous throne
Your wheels on fire
Your one desire
Is to point and push your will on everyone
Go on and do it
It's so like you
You can point and push
But we will overcome Your wheels on fire
Your one desire
Is to turn and twist all night long
Go on and try it
But no-one buys it
You can turn and twist
But we will overcome We will overcome
