

One World

Insted

Listen, Mother nature will provide us with nothing, when careless living leads to destruction. And as our earth grows old, will our future generations have something to hold. One world - we must protect.

One world - we must correct.

One world - we must protect.

One world Stop it. Our environment's in a sad situation. It's our responsibility. Let's face it, we're destroying nature's gifts. How many more years are we gonna live like this. One world - we must protect.

One world - we must correct.

One world - we must protect.

One world

It's time to think about it

before there's nothing left!

Then there's no second chance

Listen, Mother nature will provide us with nothing,
when careless living leads to destruction.

And as our earth grows old, will our future generations have something to hold.

One world - we must protect.

One world - we must correct.

One world - we must protect.

One world
