

# Abraxas

## Dopethrone

Eros and Thanatos are branches on the same old tree  
Rooted in the soil of shadow and light  
If God was separated from the dark twin, the devil  
Could He ever know the soul of mankind? We want a new God called Abraxas  
Enter the Pleroma and see that nothingless is all  
And you must destroy a world to be born  
Alpha and Omega are the beginning and the endUnited in the shape of Abraxas  
Darkness and the light  
Sermones ad Mortous, empty fullness  
Abraxas, your words is a riddle to be solvedYou bear the mark of Cain and you are fighting like a bird  
To free you from the egg, the egg is all the world  
The Sermon to the Dead a gospel to another life  
Hear the words of Cain, the sinner and the saintThe grave is a flower and you are dying to be born  
Baptized by fire and you will slough your skin  
The sign of Abraxas the circle of the solar year  
Deep in the winter you'll see the sun be born
