

# Morphing Into Primal

## In Flames

Detonation  
Fireworks and alchemy  
Genes spliced and triggered  
into the future and her organic caveSeismorgasmic omnipotence  
scenes of magma in my eyes  
Eruption stones my systemI owe this to the animal inside  
and the stiffness that blocks out the daylight  
Morphing into primalI'll cover every particle from there to Andromeda  
not forgetting a single location  
from the throat of Ibis to the co-ordinate of MatterhornMy shot is genesis and catharsis  
Penetratonaut in a cosmology of lustSuck this subterreanean creature out  
and show it proudly to the house of heaven  
With one slight wave of my hand star dissolvesDissolve my brain  
Block my lungs  
I'll die from fever tomorrow  
when locked in sych a perfected "now"
